Field Camp:

Eastern Washington University runs a four-week geology field camp for 9 quarter credits (6 semester credits) in southwestern Montana. Geology field camp is a capstone course for an undergraduate degree in geology and a prerequisite for most graduate programs in geology. Students describe rock units and make geologic maps in a rugged landscape dominated by the Tobacco Root, Pioneer, and Beaverhead Mountains. Field instruction includes detailed description of rock units, GPS skills, and geologic mapping using topographic maps and air photos. Students undertake a variety of group and individual exercises.

Facilities:

EWU field camp is based on the campus of University of Montana Western in Dillon, MT. Students stay in campus dorms and eat breakfast and dinner in the dining hall. Bagged lunches are provided each morning. Students have access to the library, computer lab, physical education facilities (including swimming pool), and classrooms. Internet access is available in dorms.

Prerequisites:

Students must have junior or senior standing in a geology program. Prerequisite classes:

Physical Geology	Historical Geology
Mineralogy	Petrology

Recommended classes:

Geomorphology (Surface Processes)	Structural Geology
Sedimentology/Stratigraphy	Paleontology
